ALDAR

CASE STUDY

COMPUTER & POWER TECHNOLOGY

SUMMARY & CHALLENGE:

Awarded a project for Al Dar head Quarter in Al Raha Beach Area, to build a Complete Juniper End – to – End Infrastructure for Campus LAN, WAN, Security and Wireless.

Aldar Properties PJSC is undertaking multi-billion Dirham civic projects to help develop Abu Dhabi, the capital emirate of the United Arab Emirates, into an international business magnet and tourist destination. As the Emirate's premier real estate development, management and Investment Company, Aldar's vision is to establish Abu Dhabi as the UAE's most dynamic forward-thinking real estate market by creating unique and prestigious developments that can be used as a benchmark of quality, whilst adhering to the cultural and natural heritage of the city.

IMPLEMENTATION:

The Head Quarter will be connected to all the branches distributed in Abu Dhabi, with a centralized:

- ✓ Centralized Security, NAC, SSL.
- ✓ Centralized Data Center.
- ✓ Centralized Cisco IP Telephony.
- ✓ Centralized Juniper Wireless Network.
